Ordering

Always furnish us with MODEL and NUMBER of your tractor when ordering parts.

Order all parts from the BRANCH or DEALER in your territory—see page opposite for directory of branches or dealers.

To obtain parts promptly give the NAME, CATALOG NUMBER, and LETTER of parts wanted. The number of your tractor can always be found on the brass name plate at rear of transmission case.

When telegraphing or cabling for parts use UTILITY CODE as explained on page 4.

Do not order by sets or pairs as this might be misleading; for instance, one set of connecting rod bearings might mean bearings for one rod or all four bearings for the engine. Always give the quantity of parts desired.

Always give complete shipping instructions including local address, and state whether you wish goods forwarded by express, freight, or parcel post.

Below is a good form of letter to use in ordering:

Willows, Calif.

Jan. 6, 1920.

*Yuba Mfg. Co.,
Marysville, Calif.*

Gentlemen:

Please send by parcel post to Wm. Jones, Willows, Calif.,—R. F. D. No. 2:

1—Hyatt bearing, Catalog No. 233

1—Steering cable, Catalog No. 141

I have a model 20/35, serial No. ———

Yours truly,

Wm. Jones.

Returned Goods and Claims

Prepay all charges on parts shipped in for repairs or replacement.

Give owner's name and address on the shipping tag. **WRITE CLEARLY OR PRINT.**

Parts shipped in for repairs should be accompanied by letter giving instructions regarding the work to be done.

When placing claim for replacement give all information that will enable us to make fair adjustment.

Claims for shortage or error in order must be made upon receipt of goods or same will not be considered.

Explanation of Code

The UTILITY CODE on opposite page was devised for convenience and economy in telegraphing for parts, etc.

Regarding parts code, see code word before each item in the book.

(Note: If your order written in plain language does not exceed ten words, do not use code words as there is no saving or advantage in doing so.)

The following example will serve to illustrate the code use:

"Ship via express C. O. D. for tractor number nine twenty 2 fifteen AB 1 twenty one AB."

The above message would be rated a 20-word telegram.

Using the code it reduces to 8 words as follows:

"Saber saloon nine twenty 2 ably 1 abyss."

Interchangeability Code

The numeral alone designates used on Model 20/35 Standard and Oversize.

The numeral with letter A designates used on Model 20/35 Standard and Oversize and Model 18.

The numeral with letter A and B designates used on Model 20/35, Standard and Oversize, Model 18 and Model 12.

LUBRICATION CHART.

MAGNETO—Use sewing machine oil. Lubricate once a week with two drops of oil in each bearing.

REVERSE CLUTCHES—Remove brass screw in drum and fill with same grease as used in transmission. Use grease gun. Fill every 500 hours.

TRANSMISSION—In summer use light transmission grease and in winter a heavy transmission oil. Replenish as needed. Clean twice a season. The oil level should just touch the shafting.

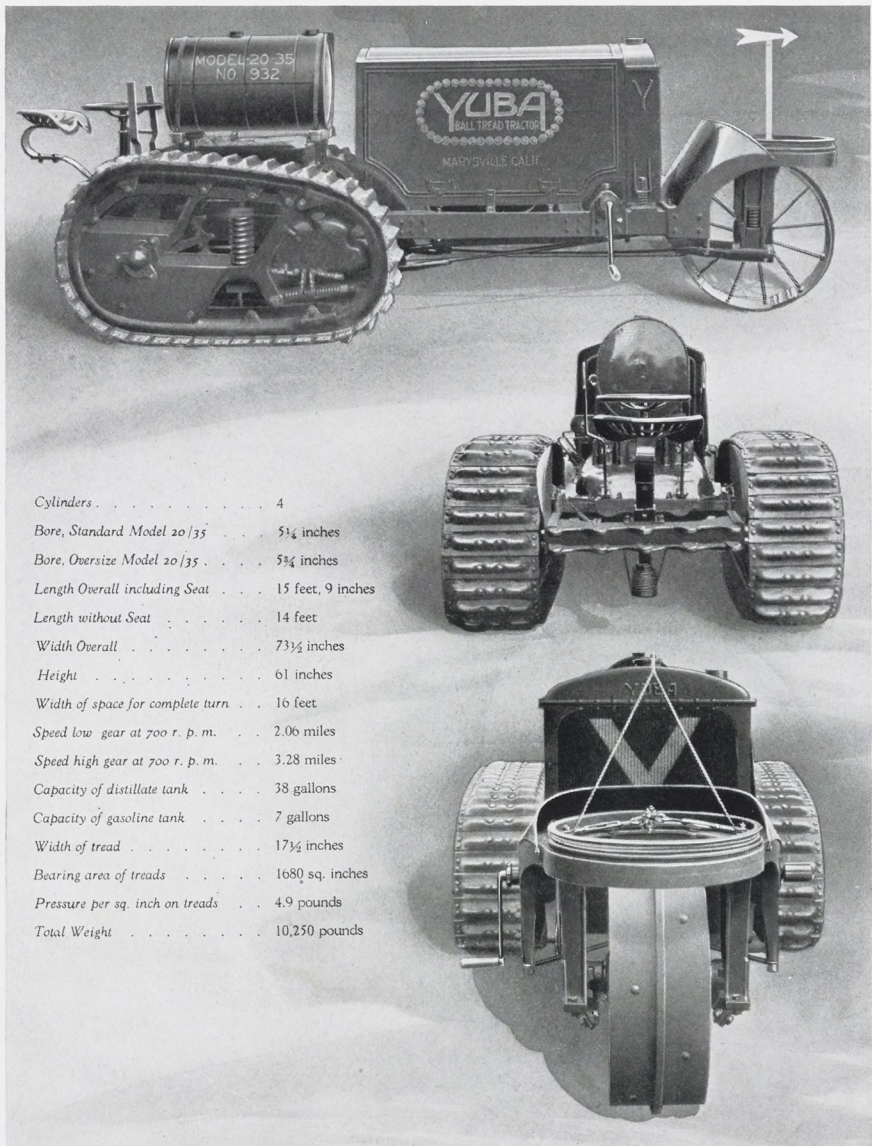

GREASE CUPS—Turn down one-half cup twice daily.

MOTOR—Unscrew cap and fill thru breather. Use heavy tractor motor oil in summer and medium or light in winter. Drain, clean and re-fill every 50 hours.

TRACK OIL POTS—Use crude oil for summer and heavy black lubricating oil for winter. Fill daily.

REAR AXLE GREASE CAP—Use heavy cup grease. Fill daily. Screw down every two hours.
